Seattle, WA, US

Statistics Master's student at the University of Washington with experience using R and Python for data analysis. Former mock trial captain with experience leading teams and presenting complex information in high-pressure settings. Currently building expertise in causal inference, machine learning, and AI to understand consumer behavior.

Core Skills

- Programming & Analysis: R (3 yrs), Python (1 yr), SQL (1 yr)
- Data Tools: ArcGIS Pro (1yr), Excel (5yrs), Google Sheets (5yrs), Pytorch
- Work & Collaboration: Google Workspace, Microsoft Office, GitHub

Education

University of Washington (in progress) 09/2025 - 03/2027
Master of Science Statistics - Advanced Methods and Data Analysis
Relevant Course Work in Machine Learning, Applied Linear Regression - GPA: 3.66/4.0

Macalester College 08/2019 - 05/2023
Bachelor of Arts Economics - Minors: Data Science, Political Science
GPA: 3.80/4.0

Relevant Project Experience 12/2022 - Present

The Effect of Hospital Mergers on Quality of Care *Industrial Organization Capstone*
- Created an R script to clean and validate data for 3,000 hospitals
- Applied robust difference-in-difference analysis to time-series data on quality of care

Cognitive Bias in Uncertain Green Purchasing *Behavioral Economics Capstone*
- Implemented an experiment using HTML in Qualtrics to collect randomized data to measuring how information access affects consumer decision making
- Conducted end-to-end analysis of data using logistic regression to predict “selfish” decision making

Pedestrian Fatalities: Causal Discovery *Causal Statistics Project*
- Cleaned, merged, and applied missRanger imputation to a dataset of 1.1M+ fatal crashes and over 140 variables using R
- Applied the RFCI causal discovery algorithm to construct Partial Ancestral Graphs (PAGs) identifying confounding and predictive variables in crash data

Financial Tracking App *Personal Project*
- Built a custom financial tracking application using Google AppSheet and Sheets to automate personal budgeting and expense tracking
- Designed various visualizations and dashboards to streamline analysis

Work Experience

Mathematics Tutor 12/2023 - 08/2025
Classroom Matters | Berkeley, CA
- Taught personalized lessons to improve test scores in AP Statistics and other math classes
- Translated complex technical concepts into simpler terms based on student needs
